### LEXINGTON WEEKLY NEWS ROOSEVELT AND HIS ATTITUDE TOWARD THE NEGRO VOTE.

Colonel Rosevelt has written a letter on the Negro question in which he says he would eliminate the Negro in the South for the present at least, while holding on to him in the North, and it has brought out some vigorous comment in and out of Congress. The Colonel is simply playing for votes in the South, but he will gnaw a file. He snows that as a political factor the Negro was already been largely eliminated and he is trying to appeal to the prejudices of the white people of the South in order to secure their support. He will reckon with his host, however. Most of the Southern people, at least, are wise to the ways of the erratic rinius and take little stock in any-hing he does or suys. His effort for social equality by having Booker Washington dine with him in the White House? His appointment of a Negro to the Negro race than Roosevelt is to he national people.

We have some men right in Lexing of the Nouth the Big Bull Mose must not think he has won them. It was but evidence of their natural politicness and consideration of visitors. After holding open the door of hope so long to the Negro it is too late now for the Colonel to fool anybody by slamming it in his face. He can't hoodwink South-ern Lemocrats. in his face. He can't hoodwink South-

We reproduce above what the Lexington Herald had to say in its issue of August 7th which plainly shows the attitude and feeling of the South towards the Bull Moose. It further shows that the Southern white man, that is of the better class, though he be a Democrat, has never reached the point where he would strike a blow at the Negro of the Southland that would absolutely cut him off from all avenues of progress.

If it is a fact that Mr. Roosevelt wrote a letter setting forth that the Progressive party was to be strictly a white man's party, there was absolute ly nothing else for the comity to do other than to obey the boss. This third party is Mr. Rcosevelt's party only, started by him when no one else even thinking of such a thing. He is now, and always has been, in It's pretty tough, fellows, but full control and is solely responsible for everything that goes with the party. His own explanation of his attitude towards the Negro, is not by any means satisfactory and only more fully shows him as he is.

The Lexington News, in the beginning of the district campaign, after a careful observation of the past hisory of both Mr. Taft and Mr. Roosevelt, began to support Mr. Taft, and ias all along earnestly opposed Mr. later, find that the whirligig of Roosevelt, our contention being that Mr. Taft is a true friend to the Negro and a fit man for the head of the nation, while Mr. Roosevelt's Bull Moose Every fair minded Negro in methods, if nothing else, made him absolutely unfit. Not only that, we the land will commend President fail to see that he ever has in his life Taft for coming to the assist- done anything for the Negro worth and for anything that he is not en-

### PAPER CURRENCY TO BE REFORMED Thirty-six Feet of Gold Wire Wrapped

Plans to Reduce Size of Old Notes by One-third.

### WILL EFFECT A BIG SAVING.

Nine Hundred Thousand a Year to the Government and \$200,000 to the National Banks-Also to Have Uniform Design For Each Denomination.

The size of all United States currency and national bank notes probably will be reduced by one-third and their designs revolutionized for the sake of economies to the government, convenience to the public and safety against counterfeiting. This decision practically has been reached by the secrey of the treasury, Mr. MacVeagh. oposed to make the dimensions inches. The paper money ulation measures 7.28 by The designs of all paper tates notes and cernal bank notesand made uni-

is move is expected to save the government about \$900,000 annually and the national banks, which pay for the plates for their notes and part of the cost of redemption, about \$200,-000. The economies would be effected in steel for the plates, in paper and in

For many months the only deterrent to the step by executive authority has been the belief that it would be necessary for congress to appropriate about \$1,000,000 to replace the national bank note plates which have been paid for by the national banks. This problem has been solved by a plan to have the general design of all national bank notes uniform, requiring only one engraved plate for each denomination. and to place on the notes by surface printing the name, location and charter number of the bank. This would do away with separate plates for each

Time Required For Change.

Eighteen months would be required to effect the change by the preparation of the designs, engraving of the plates and printing of the notes. To meet the objection that for a time at least there would be two sizes of currency in circulation it has been suggested that the government print in advance a sufficient quantity of the notes of the new be exchanged at the enbirose uries and national banks on a fixed date. The change could be substantially accomplished within a few days, easury officials believe. There are ineteen different designs of cur-

Eath denomination would be aracterized by a distinctively American historical portrait engraved in the center of the note. In time the portrait would be a distinguishing feature of each denomination and would be a safeguard against counterfelting, especially the prevalent practice of raising a note to a higher denomination.

The department is considering using portraits as follows: \$1 note, Washington: .\$2, Jefferson: \$5, Lincoln: \$10, Cleveland; \$20, Jackson; \$50, Grant; \$100, Franklin; \$500, Chase; \$1,000, Hamilton.

### PHILADELPHIA MINT.

Nearly \$13,000 000 Coined In a Year. Annual Report Shows.

During the past year the Philadelphia mint turned \$13,000,000 worth of metal into good jingling money. In addition it coined half a million pesos for the republic of San Salvador. This is shown in the annual report, which has just been issued.

Inspectors are sent from Washington every year to go over the books at the mint, to weigh the metal on hand and see that the building is overhauted in the search for any gold dust which may be lying around. Scarcely any loss resulted from the handling of the metals this year.

In detail the report of the mint states the values of the various coins made in twelve months: Double eagles, \$2.-606,580; eagles, \$1,041,680; half eagles, \$1.830.835; quarter eagles, \$890,595; total gold coinage, \$6,369,090; half dollars, \$904,332.50; quarter dollars, \$1,-004,166.25; dimes, \$2,948,066.50; total silver comage, \$4,856,565.25; five-cent pieces, \$1,159,388.20; cents, \$609,981.95. The total value of the 120,448,793 pieces coined was \$12,995,025.40.

### COLORADO LEADS IN GUNNERY

Twenty Points Ahead of the Delaware on Year's Average.

The final score of all the battleships and armored cruisers in the navy in gunnery for the last fiscal year has been completed. It shows that the Colorado leads, with twenty points intervening between her mark and the next ship, the Delaware. The list is as follows, in the order of standing:

Colorado 7	1.61	Virginia	27.57
Delaware 5	1.43	Ohio	27.48
New Hampsnire 3	9.93	California	27.08
Michigan 3	3.28	New Jersey	24.63
Saratoga 3	7.47	Mississippi	24.57
South Carolina. 3	3.71	South Dakota	24.03
Maryland 3	0.97	Nebraska	23.90
North Dakota 3	0.89	Georgia	23.00
Kansas 2	9.00	Missouri	19.09
Louisiana 2	7.82	Minnesota	18.47
Connecticut 2			
The Utah, R	hode	e Island, Flo	rida,

Washington, Vermont, West Virginia, Maine and Idaho did not get into the fort or Darmstadt.

RARE OPERATION PERFORMED

Around the Aorta.

An operation on the heart was performed recently in Bellevue hospital, New York, in which thirty-six feet of gold wire were wrapped around the aorta, the great artery leading from the heart, and a current of electricity sent through the wire, which reduced the swelling of the artery sufficiently to allow it to perform its natural func-

No anaesthetic was used during the operation, but the incision, which was made in the back of the patient be-clerk. tween the fifth and sixth ribs, was sprayed with cocaine. At the close of the operation, which lasted about four hours, the physicians expressed themselves at satisfied, and while the operation is not expected to entirely cure the patient, it is expected to prolong

The patient who underwent the operation was Oscar Nielson, fifty years old, a cabinetmaker, suffering from a swelling of the aorta, which had grown to such an extent that it was only a question of a short time when the vessel would break and death follow.

After the incision was made the gold wire, attached to a cannulated needle, was run through and wrapped around the aorta. The wire was thinner than a hair, and after it had been wound around the heart in spring fashion the end in the needle was taken out and attached to an electrical machine, the current of which was turned on and sent through the wire. The electricity hardened the artery, and in a short; time the blood started to circulate freely through the aorta, and at the same time the heart was allowed to perform its functions. The patient was under observation for a period, after which dead.-Green Bag.

the wound was closed. This is the second operation of its kind performed in this country. The previous operation took place five being Henry Griffin. Twelve feet of gold wire were used on Griffin, after it was said that he would not live a week, Two weeks later he left the hospital and is now well and hearty.
